ACE Advantage Crane Kits are the first of its kind in the overhead crane industry.

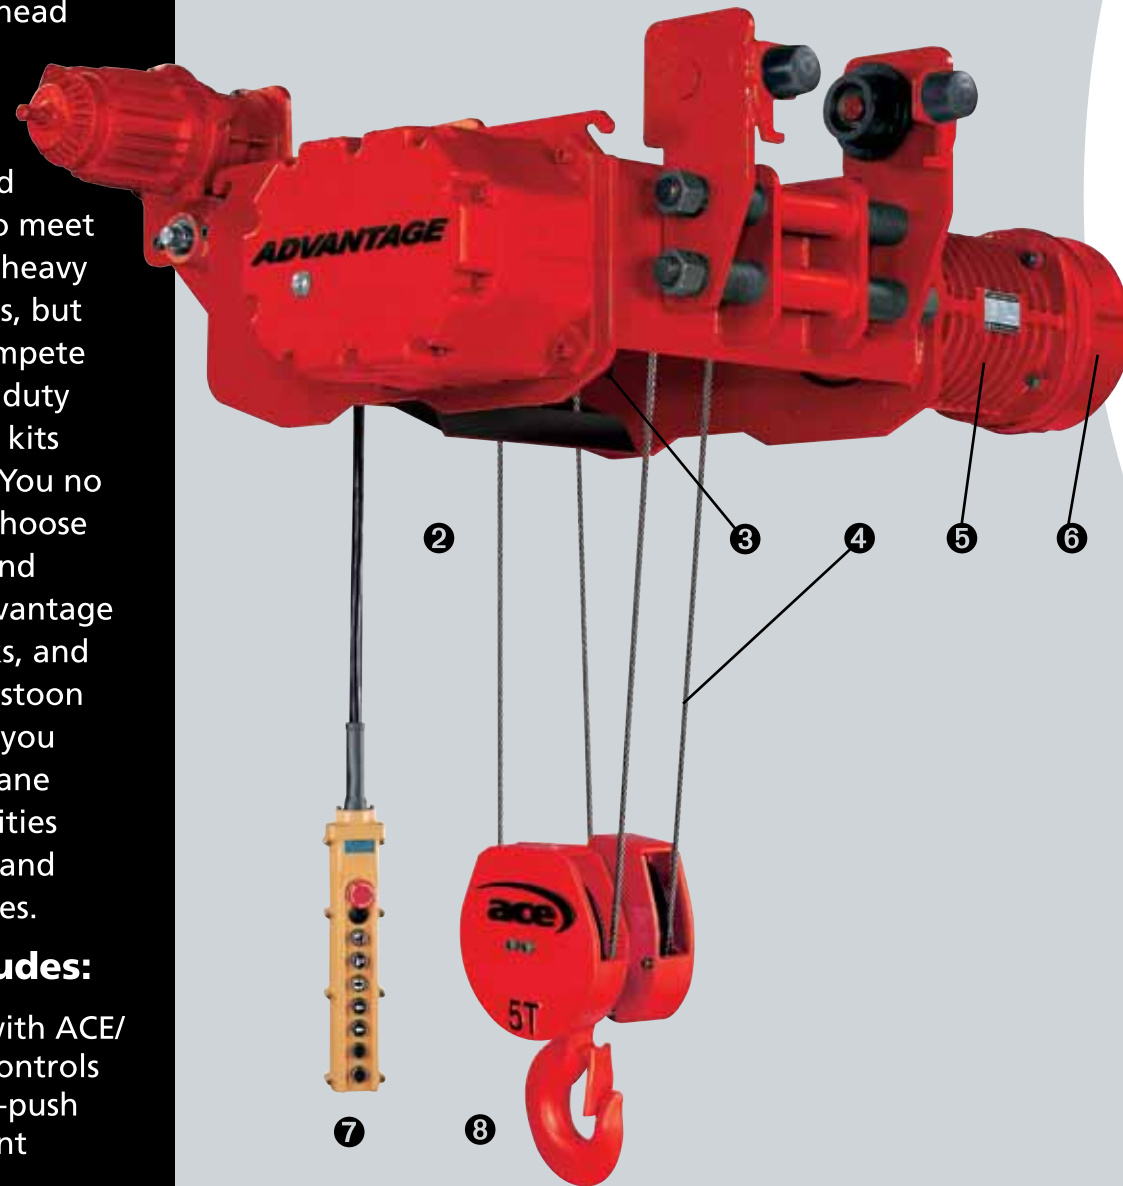

These crane components are designed and manufactured to meet the demands of heavy duty applications, but are priced to compete with other light duty hoists and crane kits on the market. You no longer have to choose between price and quality. Our Advantage hoists, end trucks, and plug and play festoon systems provide you with turn-key crane building capabilities for both Class C and Class D duty cycles.

Each kit includes:

- Trolley hoist with ACE/ Toshiba VFD controls and durable 8-push button pendant
- Upper and lower geared limit switch, and paddle type upper limit switch.
- Pair of ACE industry leading end trucks High quality plug and play festoon system.

ADVANTAGE

STANDARD FEATURES

1. Mechanical Load Brake

Mechanical load brake provides redundant braking for maximum safety.

2. Trolley

Trolley wheels are hardened to 400 BHN. Universal tread design for use on S-beam or wide flange.

3. Limit Switches

Geared upper and lower limit switch and paddle type upper limit switch for maximum safety during operation.

4. True Vertical Lift

No need to compensate for hook drift.

the line. A reputation of quality will separate you from your competitors and give you an Advantage in the marketplace.

LOW COST OF OWNERSHIP

Advantage components are designed to exceed the minimum standards for quality, not just meet them. They are designed to minimize maintenance costs and offer the lowest cost of ownership. These are not “throw away” components. They are built to last, and parts are available and reasonably priced.

VALUE

The value is simple. With ACE Advantage crane kits, you can build high quality cranes at competitive prices.
